Charting
Plotting
Navigation

Nautical Academics is a recognized professional Captain's School approved by the United States Coast Guard to teach and examine for the U.S.C.G. licenses for both the basic 6 Pak Captain's and Master's License(s). The school teaches the required 56 hour course for the 6 Pak and administers the exams at the conclusion of the course with an extremely high passing rate.

Nautical Academics provides all materials, manuals, charts and also the most recent C.G. applications. They pride themselves with guiding the student candidate through the paper work and all necessities including the physical exam requirements, sea service time, drug testing, etc. and they remain associated with the student after the school academics and until the license is in hand. This is a courtesy that very few maritime schools provide.

There are many *Nautical Academics* graduates enjoying their licenses, the knowledge gained, and the rewards of this chosen profession, and making contributions in the maritime community.
